

# The Delta Propeller Company

## How To a Install Drive Sleeve and Drive Sleeve Adapter

**1** Set propeller on a hard surface and remove drive sleeve adapter from propeller.

**2** Place drive sleeve adapter onto drive sleeve with legs on face of drive sleeve.

Tap on drive sleeve adapter to remove drive sleeve.

Set new propeller on hard surface face down and install drive sleeve.  
(Note that the drive sleeve is tapered and will only install in one direction.)

Flip propeller face up and install drive sleeve adapter into propeller (drive sleeve)

\*When installing the assembly onto the shaft the drive sleeve will seat itself into the propeller while you are tightening the propeller nut.

\*After installing this assembly to the shaft, rotate propeller to insure there are no obstructions before operating.

\*The information on this page is provided as a guideline and should not take the place of specific instructions given by your product manufacturers. Always consult your owners manual for specific instructions and safety information.
